# Record & transcribe your meetings accurately and with ease

## How it converts speech to text

### Super fast transcription

The fully-automated and secure speech-to-text systems typically transcribe a 30-minute audio recording in 3-4 minutes.

### Edit text in the browser

It's like an online word processor with the audio stitched to the text. Click on a word and the audio will play. Highlight, edit, comment, and share.

### Export in dozens of formats

The software has an export format for your needs. Subtitles, captions, MS Word, Google docs, and many more.

## Tips to get the most accurate transcript:

1. Is the audio free from background noise?
2. Are speakers close to the microphone?
3. Are speakers talking one at a time?
4. Are speakers talking clearly?

For best results ensure you are using a high-quality meeting recorder

DPM8900

**PHILIPS**

We use an online speech recognition together with our preferred and tested audio recording products. We assist with setting up your account and getting your solution up and running, as well as configured to achieve the best results.
