About us

We are the global leader in professional dictation solutions, active in over 50 countries, serving more than 4 million users, and supported by a network of 1000+ partners. We develop and market industry-leading dictation and transcription solutions, including Philips SpeechLive for cloud dictation, automated documentation workflows with AI-powered speech recognition, and award-winning dictation devices, such as the Philips PocketMemo and Philips SpeechMike.

Our mission is to empower every user to be more productive by simplifying their work with smart, voice-based solutions. Headquartered in Vienna, Austria, we have regional offices in Australia, Canada, Belgium, France, Germany, the United Kingdom and the United States.

**70 years experience in developing

Philips SpeechLive at a glance

- **Global leader:** powered by Microsoft Azure AI services, SpeechLive offers an **all-in-one platform for professionals** seeking efficient, accurate, and secure voice-to-text solutions.
- **Unmatched accuracy:** seamless integration with **advanced speech recognition** technologies, ensures real-time or back-end transcription with exceptional precision.
- **Ultimate flexibility:** convert voice to text **anytime, anywhere, from any device** for maximum productivity on the go.
- **Trusted worldwide:** in the SpeechLive cloud **your data is protected** by industry-leading security standards.
- **Always up-to-date:** a cloud-based solution with **automatic updates** ensures access to the latest features without additional effort.
- **Seamless integration: strategic partnerships** with top technology providers, **including iManage and Microsoft**, guarantee effortless integration into existing workflows.

How Philips SpeechLive works

Speak

Record

- directly into the web browser
- with the mobile app
- with compatible dictation devices
- upload existing audio file

Send

Real-time speech recognition (front-end)

Speech-to-text in real-time within the SpeechLive browser or directly in third-party apps.

Post-processing speech recognition (back-end)

Automated transcription of dictations and audio files into text, enabling later finalization.

Transcription via assistants

The recording is directed directly to the internal assistants or to an external service agency.

Done

Receive final document

Superior accuracy with Philips dictation devices

Philips SpeechLive is compatible with any device that has a microphone, including laptops, desktops, smartphones, transcription hardware and even Apple Watches. If you prefer, you can also upload dictations from a voice recorder.

For optimal speech recognition, we recommend using one of our award-winning dictation devices, such as the Philips SpeechMike Premium microphone, known for its advanced noise-canceling features and built-in support for Dragon speech recognition.

The top choice for professional dictation worldwide!

Data security, storage and privacy

Thousands of customers worldwide trust Philips SpeechLive with their data. Data security has always been a top priority.

Philips SpeechLive ensures security with AES 256-bit encryption, multi-factor authentication, and single sign-on (SSO) for safe access. Features like backup, data recovery and restricted file access provide additional protection. Payments are processed by PCI DSS-compliant providers, and speech recognition runs on secure servers without storing audio or text.

SpeechLive benefits from being hosted on Microsoft Azure, offering regional data storage, compliance with local laws, and Azure's robust security measures, including threat prevention and a 99.9% uptime guarantee. Backed by robust infrastructure protections and compliance with over 90 global regulations, Azure's extensive cyber security investments and team expertise make it a trusted choice for major enterprises worldwide.
